## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 13 include the limitation “step-like.” This limitation is indefinite because it is unclear what applicant considers like a step. The scope of the claim is unclear.

Claims 1 and 13 includes the phrase, “forming a trailing edge to said peripheral surface of said second roll, forming a leading edge.” It is unclear what the object of the phrase “forming a leading edge” is. If it is the second surface, it is unclear how the second surface can form a trailing edge and a leading edge. The examiner cannot ascertain from the specification what applicant is trying to claim. This renders the claims so unclear that the claims will not be further treated on the merits.

Claim 13 includes the limitation “said second axis of rotation.” It is unclear what applicant is referring to. The body of the claims only sets forth one elongate rotatable roll with one axis of rotation.

### ***Conclusion***
